

Paper Dice

Templates

12 Colors!

Instructions

The black and white templates can be printed on colored card stock for a limitless variety of colors!

To make your dice more durable, I recommend giving it a light spray of clear finish (matte). Do this OUTDOORS. Laser printers sometimes have trouble getting the ink to stick to card stock and the spray helps it stay put.

Crease the folds first.

After you cut out the template, crease the folds with the handle of your scissors or other smooth object so they are nice and crisp. Then glue the dice together. There are numbers on the tabs to help you glue it in the right order.

Here's a great way to use your dice!

Expressive Monkey has super fun drawing pages that use dice!

Students get clear instructions and lots of choices for making unique drawings that they will beg to draw over and over!

Roll & Draw

Choice Drawing

Directed with Choice

More complicated drawing may need a step-by-step page to help students get started (such as the turkey).

Students can still use the roll & draw or choice pages to make different choices for the turkey parts.
